CAREER OBJECTIVE

A self-motivated, creative, and ambitious IT professional seeking a challenging career in an organization to get a position of responsibility using my skills and efficiency to communicate my ideas & views and commit myself to serve my organization in the best possible way with sheer determination and commitment.

PROFILE OVERVIEW

- Experience in designing, developing, implementing and testing the components of the application UI.
- Experience on the latest versions of Angular JS 1.5 and above by developing single page web apps using front-end routing.
- Strong background in HTML5, CSS3, native JavaScript, jQuery, Bootstrap, JS frameworks and methods (UI Development).
- Over 3 years experience in JavaScript concepts, AngularJS directives, services, promises and callbacks.
- Deep knowledge of AngularJS practices and commonly used modules based on extensive work experience and creating self-contained, reusable, and testable modules and components.
- Collaborate with Design and Backend teams to create responsive performance web applications.
- Experience with Agile software development methodologies, including Scrum, designing and implementing applications to satisfy a given set of requirements.
- Experience with JIRA, ServiceNow, configuration management, version control (Git), design reviews, and software documentation.
- Knowledge on Angular 2+ versions by building a POC of a scalable web application.
- Taking feedback from users and making interaction changes and troubleshooting performance issues.

WORK EXPERIENCE

01/2019 – Present
Software Engineer

Company: Tech Mahindra

Project Name: Compass Time Reporting

Client: Refinitiv and London Stock Exchange Group

Responsibilities:

- Building Compass Time Reporting application, a 3-Layer architecture to Refinitiv users for their daily tracking of working time which is built through AngularJS.
- Defining modules (like Time login, Time approval), controllers, services and linking them to create self-contained, reusable, and testable code.
- Developing a single page web application using front-end routing.
- Pushing and pulling daily login data of employees to and from DB through native procedures.
- Processing the file of employee's info that we get from LDAP team through a CRON job every day.
- Writing JIRA REST API's for any new functionality or connectivity.

- Designing, developing, implementing, testing and supporting the components of the CTR application.
- Following agile methodology by logging all the tasks on JIRA board and working on those tasks independently.

03/2018 – 01/2019

Associate Software Engineer

Company: Tech Mahindra

Project Name: App-System-Management

Client: Thomson Reuters

Responsibilities:

- To work as a ServiceNow administrator by handling different type of incidents, service catalog items and configurations.
- Performing various activities in ITSM module.
- Granting access to various groups and users depending upon the permissions they have.
- Providing second level support to IBM Tivoli Netcool Omnibus.
- Troubleshoot issues related to IBM cloud Orchestrator (ICO) and TSA.
- Troubleshoot issues related to Probes, Gateways, Object server, Netcool GMI DB, Global Event View (GEV) and Netcool Impact.

11/2016 – 04/2017

Intern Trainee

Company: GMR Airport Developers Limited

Project Name: E-Boarding

Responsibilities:

- Experience working in India's first E-Boarding facility in "Rajiv Gandhi International Airport", Hyderabad.
- Exposure to develop and manage KIOSK application built through Java that is used to scan barcode on boarding pass and validate data from database.
- Experience in getting data from airlines and merging it to the company's DB which is used to validate a person near electronic gates.

POC's

Project Name : Weather Forecast

Technologies Used : AngularJS, HTML, CSS, Bootstrap

Description :

- Built single page weather forecast application using AngularJS with four components.
- Implemented an HTML-based weather application, capable of showing the current temperature & five day forecast.
- Ability to auto-detect the user's location, or have them manually select it.
- Ability to switch between degrees C & F.
- Responsive layout suitable to iPad/iPhone, portrait and landscape.

Project Name : Recipe book and Shopping Application

Technologies Used : Angular 2+, Typescript, Firebase

Description :

- A web application built using Angular CLI version 11.2.3 that allows users to manage their recipe book and build shopping lists.
- Allow users to sign up with email and password. Edit, Add or Delete a Recipe and select ingredients to add from recipe to shopping list.

- Creating components, custom directives, services and passing parameters through components using EventEmitter and adding Routing.
- Fully functional CRUD operations with http access using RxJs observables.
- Used Firebase and executed the unit tests via Karma.

Project Name : Personal Website

Technologies Used : HTML5, CSS3, Bootstrap and Javascript

Description :

- Built a portfolio website of my own which tells all about me.
- Showcased all of my 7 small projects that are built on different concepts of web development at one place.
- Everything has been hosted on Git where I commit all of my new updates.

Other Projects: Blocks Breaker game, Currency Converter, Custom Music Player, Typing game, Hangman game and Movie seats booking clone using HTML5, CSS3 and Native Javascript.

ACHIEVEMENTS

- Received **“X” (excellent)** rating among my team members in the project for the financial year 2020-21.
- Received appreciation from client and **“Pat on back award”** for the effective quality and management of the application.
- Certified as Microsoft Technology Associate in **“HTML 5 Application Development Fundamentals”** and **“Software Development Fundamentals”**.

EDUCATION

- **B.Tech** in Computer Science and Engineering from GMR Institute of Technology, Srikakulam with a CGPA of **8.7** out of 10.
- **XII** from Narayana Junior College, Visakhapatnam with **92.5%**
- **X** from Bhashyam Public School, Srikakulam with **91%**

INTERNSHIPS / TRAININGS UNDERTAKEN

- Completed 6 months internship at **“GMR Airport Developers Limited”**, Rajiv Gandhi International Airport, Hyderabad.
- Completed one month internship at **“Flash Forge Ltd.”** Visakhapatnam.
- Completed 3 months training as a fresher in Tech Mahindra under HTML, CSS, SQL, Java and Testing.

PERSONALITY TRAITS

- Adapts to changing work environments, work priorities and organizational needs.
- Diligent and organized.
- Creative.
- Flexible and active team player.
